Key skills

- Communication skills
- Microsoft Word
- Microsoft Excel
- Git
- Javascript
- Typescript
- React Native
- Swift
- Objective C
- Java
- AWS
- Python

Education

Masters in Information Technology from
University of Waikato
2024 - Currently Pursuing

PG Diploma in Software Development from IIIT
Bangalore
2020 - 2022

BTech in Electronics & Communication from
Jaypee University of
Engineering & Technology
2012 - 2016

Summary

I am an enthusiastic individual with extensive expertise in mobile app development and strong teamwork experience. I thrive in fast-paced environments and am highly adaptable to various roles and industries. I am eager to apply my skills, learn from experienced professionals, and contribute to innovative projects.

Career history

React Native Developer/iOS at Visit Health Private Limited
April 2021 – July 2024

Led the development and maintenance of the iOS application which accommodated more than 100,000 monthly active users

Key responsibilities

- Created native iOS Cocoapods and react native npm packages to inject the health data into the PWA.
- Regularly maintained and fixed the application to ensure compatibility with OS updates.
- Frequently implemented REST APIs to integrate new features.

React Native Developer at Quillhash Technologies
May 2019 – September 2019

Developed a cross-platform mobile application from scratch for blockchain-based music rights investment, enabling secure and efficient user investments in music rights with enhanced transparency and security through blockchain technology.

Key responsibilities

- Led the client calls to understand the requirements and actively participated in the development of the UX
